49	31,5	14	M15
50	32	14,5	M15,5

### Mondopoint means?

Developed by ski boot manufacturers in order to create a universal sizing system. Mondopoint is calculated by simply measuring the length of one's foot in centimeters, from the heel to the big toe.

### Find your mondopoint size

Stand on top of a piece of paper with your heel against a wall.

Then, draw a line at your big toe.

Measure in centimeters the length of the paper to said line and you have your mondopoint size.
